

Background

Ramify (verb) = to branch out or spread

We believe that every person has an opportunity, every single day, to impart an atmosphere of positivity and encouragement to those around him or her. We are after the well-intended, well-mannered, optimistic, and energetic individual that seizes every opportunity to make life for those around him/her just a little bit better. Our belief is that if you possess an academic drive, coupled with a positive attitude, then there is nothing to stop you from achieving great things in life. And thus, we started the Ramify Positivity Scholarship.

Application Requirements

- ☐ Must be a Senior graduating May 2016
- ☐ Submit copy of official letter of acceptance from a U.S. 4-year accredited university

☐ **Please submit all material to ramify positivity.scholarship@gmail.com**

Meet the Founders

Jeevak Mattamana. After GMHS, Jeevak went onto the Colorado School of Mines to pursue his passion in geology, engineering and economics by obtaining a degree in Petroleum Engineering. He is in love with this race-modified Mazda Miata, which you can occasionally find him racing at the Hallett Motor Racing Circuit. After beginning his career at Apache Corporation he now works at TenOaks Energy Advisors, a boutique A&D firm in Dallas, TX.

Richard Vidal. After Green Mountain High School, Richard attended the Colorado School of Mines, where he majored in Mechanical Engineering and Economics. He enjoys running at Red Rocks Amphitheatre and leisure reading at libraries. Richard is an Associate at KeyBanc Capital Markets in their Oil & Gas Investment Banking group. Prior to KBCM, he worked for Wells Fargo Oil & Gas Equity Research and ExxonMobil.

David Wang. After graduating from Green Mountain High School David went on to pursue his passion for technology by attending the Colorado School of Mines, where he majored in Computer Science. He is a former breakdancer with an arsenal of gravity defying stunts. He currently works for Janus Capital as a web developer. On the side spends time to program and learn new web technologies.
